

## SAFETY POLICY

White Bay 6 provides essential infrastructure and services to the boating community in NSW. The company prides itself on the quality of its people, where skills and experience levels play a vital role in the continued success of its operations. To this end, management aspire to a standard of safety in excess of that required by state and federal legislation.

The Management at White Bay 6 are committed to ensuring that all employees, contractors and customers are provided with a safe and healthy environment to work or visit.

Management commits to:

- Developing, implementing and maintaining a practical, user friendly Safety Management Plan for work activities at the facility;
- Allocating appropriate resources to maintain and implement the Safety Management Plan;
- Developing a shared sense of responsibility for safety from top management through to employees, customers, suppliers and contractors;
- Communicating minimum safety requirements for the site to all employees and contractors at induction and on a regular basis;
- Obtaining risk assessment documents and applicable licenses and permits from contractors to ensure they are competent and capable of undertaking work in a safe manner;
- Holding each employee and contractor responsible and accountable for the work areas they control;
- Recording and reviewing safety incidents to identify trends or safety issues requiring attention; and
- Analysis and reporting of safety performance at Management Review Meetings.

White Bay 6 will comply with all laws, regulations and applicable standards, and encourage employees and contractors to seek opportunities to operate beyond compliance.

Guy Bailey  
Director  
White Bay 6 Pty Ltd
